**TALKING POINT**  
**Schools must guide students to opt for right stream**

**Triangular session is important**  
 We conduct proper counselling from class IX to motivate students. Counsellors conduct last sessions to discuss various streams following which parents/students interested are organized to test the students' abilities. A one-on-one session of parents and students is held and parents are asked to refrain from stopping their children's education.

**Students need to have far-sighted goals**  
 To make students aware of the avenues available to support and help in the selection of streams. Counselling sessions from class IX is important. Students today do not seem to opt for streams that take long to develop their capabilities. Instead, they opt for courses that help them make fast money and provide them with instant gratification.

**Parents should not force their children**  
 Parents should not succumb to societal norms when their children are at a decision-making juncture. Marks are not the sole deciding factor to pick the streams. We also keep in mind their aptitude and discuss with them their interest in the subject.
