

SCIENCE ACTIVITY

UKG

Kids of class UKG participated in science activities and some scientific experiments with daily objects like Fun with shadows, Fun with magnets, Sink or float, Guess my taste and Sound around.

CLASS 1

Science activity was conducted in class 1 on the topic AIR. Different activities were named as 1. Pin Wheel 2. Magic glass 3. Blow Painting 4. Candle on and off. Children learnt the importance of air in our daily life. They all enjoyed while performing the activities.

CLASS 2

'Fun with Science' activities were conducted for class 2 on 8th August where children learnt the importance of Air. Children talked with their friends with the paper cup 'telephones'. They made pinwheels. Finally, they made bubbles which they thoroughly enjoyed.

CLASS 3

For kids of all ages, doing Science projects helps develop a child's resourcefulness. It also nurtures intellectual curiosity because of the relevance to our lives and apply these life skills to everyday activities. Class 3 students had fun filled science activity on 7th August, 19 showing experiments based on plants, air occupies space, phases of moon, making of a pin wheel and a telescope etc.
